Dear Michael,

I wanted to take a moment to thank you for your product and helpful insight as we selected the appropriate detectors for our school. We recently installed the equipment shortly after our April break. We caught several students the first day the product was installed, and in the first week and have noticed a marked decrease in smoking. The word is essentially out; we do not tolerate smoking in our school, and students that do not smoke are free to use our facilities without having to deal with second hand smoke.

An unexpected benefit associated with the use of your product has also decreased, or at least brought attention to, students with substance abuse issues. When we find a student smoking using your product, we search the student according to board policy. During the course of those searches, we have found illegal substances, and those students have subsequently received discipline for the infraction, and more importantly, treatment for their addiction.

Overall, we are pleased with the product, and believe it has all but eliminated smoking in our bathrooms within three weeks.

Thank you,

A handwritten signature in black ink, appearing to read "Jason F. Tracy". The signature is fluid and cursive, with a large loop at the end.

Jason F. Tracy, Ed.D.
